RITA T6 vs N1
top 20 of 76 pathways (padj < 0.05)
Cell cycle mitotic
M phase
Neutrophil degranulation
Nervous system development
Rho gtpase effectors
Mitotic prometaphase
Rho gtpase cycle
Rhoa gtpase cycle
L1cam interactions
Regulation of plk1 activity at g2 m transition
Cellular response to heat stress
Rhobtb gtpase cycle
Eph ephrin signaling
Rhoc gtpase cycle
Sensory processing of sound by outer hair cells of the cochlea
Smooth muscle contraction
Hsf1 activation
Hsp90 chaperone cycle for steroid hormone receptors shr in the presence of ligand
Attenuation phase
Hsf1 dependent transactivation
