RITA vs DMSO (per group) (* padj<0.05)
Resolution of sister chromatid cohesion
Mitotic spindle checkpoint
Rho gtpases activate formins
Mitotic prometaphase
Kinesins
Cyclin a b1 b2 associated events during g2 m transition
Pkmts methylate histone lysines
Diseases of dna repair
Response of eif2ak4 gcn2 to amino acid deficiency
Eukaryotic translation initiation
Selenoamino acid metabolism
Cellular response to starvation
Srp dependent cotranslational protein targeting to membrane
Nonsense mediated decay nmd
Signaling by robo receptors
Metabolism of amino acids and derivatives
Regulation of expression of slits and robos
Influenza infection
Neutrophil degranulation
Hsp90 chaperone cycle for steroid hormone receptors shr i...
Regulation of hsf1 mediated heat shock response
Auf1 hnrnp d0 binds and destabilizes mrna
Cellular response to chemical stress
Interleukin 4 and interleukin 13 signaling
Chaperone mediated autophagy
Unfolded protein response upr
Metabolism of polyamines
Antigen processing cross presentation
Regulation of mrna stability by proteins that bind au ric...
Response to elevated platelet cytosolic ca2
Plasma lipoprotein clearance
Activation of the mrna upon binding of the cap binding co...
Translation
Rrna processing
Nervous system development
Hsf1 dependent transactivation
Hsf1 activation
Attenuation phase
Sars cov 1 infection
Cellular response to heat stress
