Tile vs vector under RITA (* padj<0.05)
Mrna splicing
Processing of capped intron containing pre mrna
Eukaryotic translation initiation
Response of eif2ak4 gcn2 to amino acid deficiency
Srp dependent cotranslational protein targeting to membrane
Selenoamino acid metabolism
Nonsense mediated decay nmd
Hsf1 dependent transactivation
Hsf1 activation
Attenuation phase
Cellular response to heat stress
Regulation of hsf1 mediated heat shock response
L1cam interactions
Auf1 hnrnp d0 binds and destabilizes mrna
Cell extracellular matrix interactions
Sensory processing of sound by outer hair cells of the co...
Hsp90 chaperone cycle for steroid hormone receptors shr i...
Smooth muscle contraction
Nervous system development
Recycling pathway of l1
Eph ephrin signaling
Eph ephrin mediated repulsion of cells
Sensory processing of sound
Rho gtpase cycle
Rhoq gtpase cycle
Rac1 gtpase cycle
Rac3 gtpase cycle
Rhog gtpase cycle
Rac2 gtpase cycle
Non integrin membrane ecm interactions
Extracellular matrix organization
Semaphorin interactions
Rhobtb gtpase cycle
Rhobtb2 gtpase cycle
Signaling by receptor tyrosine kinases
Neutrophil degranulation
Signaling by ptk6
Sensory perception
Signaling by vegf
Signaling by erbb2
